Letter: DYPNF-L-001 23383-COM welding documents

15/07/2025

Subject: Urgent Concern: Delay in Welding Document Return Impacting Skid Frame Fabrication

Dear Mrs. Kang,

I hope this letter finds you well.

We would like to raise a concern regarding the delay in the return of key documents, particularly the welding documentation, which is currently impacting our production planning.

As it stands, the outstanding welding documents are preventing us from initiating the fabrication of the skid frames. This delay poses a significant risk to our production schedule and may lead to further downstream impacts if not resolved promptly.

We kindly request your support in prioritizing the review and return of the welding documentation as soon as possible to avoid further disruptions.

Furthermore, we would like to draw your attention to the fact that multiple other critical documents are overdue (eg. ITP).

We appreciate your cooperation and understanding, and we look forward to your swift response.

Best regards,

A handwritten signature in black ink is written over the Airpack logo. The signature appears to be 'J. Jongepier'. The logo itself is partially obscured by the signature.
